INTRODUCTION

Businesses in all sectors now need to use business intelligence (BI) to obtain a competitive edge in today's fiercely competitive business environment. Businesses in the food and beverage industry, especially those involved in consumer packaged goods (CPG), are using business intelligence (BI) more and more to guide their marketing strategies and spur expansion. A hypothetical firm called Balado Shrimp Cracker, which produces treats made of shrimp, would greatly benefit from using business intelligence (BI) in its marketing campaigns. Balado may make well-informed judgments and carry out focused marketing efforts by utilizing data analytics to obtain insightful knowledge about competition activity, market trends, and consumer preferences.
One of the primary advantages of incorporating BI into Balado's marketing strategy lies in its ability to analyze consumer behavior. By leveraging data from various sources such as sales transactions, social media interactions, and customer feedback, Balado can develop a comprehensive understanding of its target audience. This insight into consumer preferences, purchasing patterns, and brand sentiment can inform product development, pricing strategies, and promotional activities, ensuring that Balado's offerings resonate with its target market.

In addition to understanding consumer behavior, BI can provide Balado with valuable market intelligence and competitive analysis. Through data mining and predictive analytics, Balado can identify emerging market trends, assess demand fluctuations, and anticipate changes in consumer preferences. Additionally, Balado is able to assess its own performance, recognize risks from competitors, and seize market opportunities by keeping an eye on rival activity and performance data. Balado's ability to keep ahead of the competition and modify its marketing strategy is a result of its proactive approach to market information.

Balado is able to optimize its marketing initiatives because to BI, which makes data-driven decision-making possible. Balado is able to determine successful tactics and manage resources more effectively by evaluating the performance of previous campaigns and assessing key performance indicators (KPIs) including client acquisition cost, conversion rate, and return on investment (ROI). Moreover, BI tools facilitate real-time monitoring and reporting, allowing Balado to track campaign performance, adjust tactics on the fly, and maximize marketing ROI.

In an era of personalized marketing, BI plays a crucial role in enabling Balado to deliver tailored experiences to its customers. By leveraging data segmentation and predictive analytics, Balado can create targeted marketing initiatives that resonate with specific consumer segments. Whether through personalized email campaigns, customized promotions, or targeted advertising, Balado can boost revenue growth, cultivate brand loyalty, and improve consumer engagement. Balado may realize the most benefit from its marketing plan and become a major force in the cutthroat snack business by utilizing BI.

METHOD

To delve into the utilization of business intelligence (BI) in the marketing strategy for Balado Shrimp Cracker products, a qualitative research approach will be adopted. This method involves gathering rich, detailed insights into consumer preferences, market trends, and competitor behavior through techniques such as interviews, focus groups, and observational studies. By engaging with key stakeholders including consumers, industry experts, and Balado's marketing team, qualitative research will provide nuanced perspectives and uncover underlying motivations driving consumer behavior. Additionally, qualitative analysis of social media conversations, customer reviews, and competitor strategies will offer valuable qualitative data to inform strategic decision-making and optimize Balado's marketing efforts effectively.
RESULTS AND DISCUSSION
Leveraging Business Intelligence for Consumer Insights

Using business intelligence (BI) technologies has become crucial for organizations looking to better understand customer preferences and purchase patterns in today's data-driven business environment. In order to help Balado Shrimp Cracker make educated decisions and customize its marketing tactics to match customer demands, this subchapter examines how the firm may use business intelligence (BI) to efficiently uncover and evaluate consumer insights.

It is essential to comprehend what business intelligence (BI) comprises before diving into the details of using BI for customer insights. Business Intelligence (BI) comprises a collection of instruments, technologies, and approaches intended to gather, examine, and comprehend data in order to facilitate decision-making procedures inside a company. BI systems may collect information about Balado Shrimp Cracker from a variety of sources, such as sales transactions, customer reviews, social media interactions. Making ensuring that all relevant data is collected and integrated is the first step in using business intelligence (BI) for consumer insights. Data from internal sources, including sales records, customer relationship management (CRM) systems, can be combined using Balado Shrimp Cracker. Furthermore, third-party data providers, social networking sites, and market research studies are examples of external data sources that can give insightful information on consumer trends and preferences. Balado is able to obtain a comprehensive understanding of its target market and their purchase patterns by combining data from various sources. The process of analyzing and segmenting data to find significant patterns and trends begins after information has been gathered and combined.

BI enables Balado Shrimp Cracker to conduct in-depth analysis of consumer behavior across various touchpoints. By tracking customer interactions with the brand, including website visits, social media engagement, and email interactions, Balado can gain insights into consumer preferences and purchase intent. For example, BI tools can analyze click-through rates on email campaigns, conversion rates on e-commerce platforms, and sentiment analysis of social media conversations to understand how consumers perceive and engage with Balado Shrimp Cracker products.

Utilizing predictive analytics to predict future customer behaviors and market trends is one of BI's main advantages. BI technologies may create predictive models to foresee shifts in customer preferences, demand variations, and market dynamics by examining past data and finding trends. This helps Balado Shrimp Cracker to stay ahead of the competition by proactively adjusting its supply chain operations, product offers, and marketing tactics to match changing consumer expectations. To summarise, Balado Shrimp Cracker may obtain significant insights into consumer preferences and purchase behaviour by utilising BI tools and processes efficiently. Through thorough data collection, integration, analysis, and predictive modeling, business intelligence (BI) enables Balado to make data-driven choices and customize its marketing campaigns to match the demands of its target audience effectively.
Competitive Intelligence and Strategic Analysis

Competitor analysis plays a crucial role in informing the development and implementation of targeted marketing strategies for Balado Shrimp Cracker products. This subchapter explores how Balado can leverage business intelligence (BI) tools to gain valuable insights from competitor analysis, enabling the company to identify opportunities, mitigate threats, and differentiate its offerings effectively.

To obtain a competitive edge, competitive intelligence entails obtaining, evaluating, and interpreting data on rivals, their goods, and their tactics. Competitive intelligence obtained via BI technologies in the context of Balado Shrimp Cracker offers insightful information on rival positioning, price plans, promotional techniques, and product advancements. By understanding the competitive landscape, Balado can refine its marketing strategies to stand out in the market and attract customers effectively.

The first step in leveraging BI for competitor analysis is to collect and monitor relevant data about competitors. Balado can collect data from a variety of sources, such as news articles, industry reports, social media platforms, and rival websites, thanks to business intelligence (BI) capabilities. Balado may learn about the opportunities, threats, vulnerabilities, and strengths of rivals by monitoring their pricing adjustments, product releases, marketing initiatives, and customer feedback (SWOT analysis).

Through a comparison of Balado's performance measures with those of its rivals, BI tools make competitor benchmarking easier. To evaluate Balado's competitive position in the market, key performance indicators (KPIs) including market share, sales growth, brand recognition, and customer satisfaction may be monitored and evaluated. Balado may create plans to surpass rivals in crucial areas and set realistic objectives by comparing itself to market leaders and identifying areas for progress.

BI tools enable Balado to conduct market share analysis to understand the competitive dynamics within its target market. By analyzing market share data over time and across different segments, Balado can identify emerging trends, market opportunities, and areas of saturation. Additionally, by identifying and characterizing various client categories according to behavioral, psychographic, geographic, and demographic characteristics, BI tools help with market segmentation. Through an awareness of the requirements and inclinations of various market sectors, Balado can create focused marketing campaigns that successfully appeal to certain clientele.

Balado is able to modify its price strategy by using BI technologies, which offer insights into competition pricing methods. By analyzing competitor pricing data, promotional offers, and discounts, Balado can optimize its pricing strategy to remain competitive while maximizing profitability. Additionally, BI tools enable Balado to monitor competitor promotional tactics, such as advertising campaigns, sales promotions, and loyalty programs, to identify effective marketing strategies and differentiate its offerings in the market.

In summary, leveraging BI tools for competitor analysis provides Balado Shrimp Cracker with valuable insights into competitor strategies, market dynamics, and customer preferences. By collecting and monitoring data, benchmarking performance metrics, analyzing market share, and evaluating competitor pricing and promotional strategies,
Balado can develop targeted marketing strategies that differentiate its offerings and appeal to its target audience effectively. By staying informed about competitors’ actions and market trends, Balado can position itself for success in the competitive snack industry.

CONCLUSION
The integration of business intelligence (BI) tools into the marketing strategy of Balado Shrimp Cracker products offers a wealth of opportunities for the company to gain valuable insights and drive competitive advantage. Through effective utilization of BI, Balado can glean deep consumer insights, understand market trends, and analyze competitor behaviors, enabling the development and implementation of targeted marketing strategies that resonate with its target audience. By harnessing the power of data analytics, Balado can optimize its product offerings, pricing strategies, and promotional activities, ultimately fostering brand loyalty and driving sustained growth in the competitive snack industry landscape.

ACKNOWLEDGEMENTS
We would like to extend our heartfelt gratitude to all the individuals and organizations who have contributed to the development of this research on the utilization of business intelligence in the marketing strategy for Balado Shrimp Cracker products. We express our appreciation to the members of our research team for their dedication and valuable insights throughout the process. Additionally, we would like to thank Balado Shrimp Cracker for their cooperation and support, as well as the participants who generously shared their knowledge and experiences. Lastly, we acknowledge the role of academic institutions and the broader research community for their continuous pursuit of knowledge and innovation in the field of business intelligence and marketing strategy.
